Inspection Report
Minerals Regulatory Program
May 14, 2007

Supervisor LRH

Mine Name: Brown's Canyon
Operator Name: Mountain Valley Stone

Permit number: M/043/019
Inspection Date: June 22, 2006
Time: 8:30 am

Inspector(s): Lynn Kunzler, DOGM
Other Participants: Brad Young
Mine Status: Active

Elements of Inspection	Evaluated	Comment	Enforcement
1. Permits, Revisions, Transfer, Bonds	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
2. Public Safety (shafts, adits, trash, signs, highwalls)	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
3. Protection of Drainages / Erosion Control	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
4. Deleterious Material	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
5. Roads (maintenance, surfacing, dust control, safety)	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
6. Concurrent Reclamation	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
7. Backfilling/Grading (trenches, pits, roads,	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
8. Soils	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
9. Revegetation	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
10. Other	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Purpose of Inspection:
Routine Inspection while in the area.

Inspection Summary:
This permit received final approval in January of 2003. A review of the mine site showed that the operation is following the approved plan. The operator has constructed a quarry access road between this operation and the Peoa Quarry (M/043/012). Part of the purpose for doing this is to assure either operation does not cross the permit boundary.

The operator has been salvaging soil materials in advance of the mining activity. In addition, there has been some screening of materials and the 'screenings' have been stockpiled as well to provide adequate plant growth material for reclamation.

Runoff from the site is controlled with a series of trenches/berms and silt fences. These structures appeared to be functioning as designed.

The area was free of trash and deleterious materials.

Conclusions and Recommendations:

The site is in compliance at this time. It is recommended that the site be monitored when in the area
Photos were taken to document site conditions.
